

Public Safety Surveys

Click the button below to participate in two voluntary surveys to increase community involvement in public safety.

The first survey is a registry for anyone who has special needs in the community. This information will be confidential and is only to be shared with local first responders so that they are better prepared upon arriving at the scene in an emergency.

The second survey is a closed-circuit camera survey. If you have a surveillance camera, ring doorbell or other image capturing device on your property and would like to share this information with the police department it will facilitate the investigative process in the event of an incident. This information will also remain confidential within the Police Department.

Thank you!
